

Funding is not adequate to make a difference. We need much much more bandwidth. Get rid of all funding other than level 1. Make it fair to all. I've heard to many first hand stories of waste and misspending when they get carte blanche.

Digital Divide is a major issue and try to address what is covered via level 2 funding by new programs. All students need access to technology and many working class communities are suffering from funding cuts just as the low income communities are.
